

## SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR A MULTIFUNCTION TOOLBAR FOR INTERNET BROWSERS

### ABSTRACT

A system, method and article of manufacture provide a multifunction toolbar for a web browser. A toolbar is displayed over a web browser. The toolbar is linked to a portal of a user. The portal is for aggregating content selected by the user. A bucket is presented on the toolbar. The present invention recognizes when the user selects content on a website, which is displayed on the web browser, and drops the content in the bucket. The selected content is added to the portal.
